SILVERBACK-AFRICA 2019

Train Today – Survive Tomorrow
January, 2019

SILVERBACK-AFRICA is now in its 6th year of researching, designing & imparting internationally recognized specialized military & law enforcement training packages. With over 4,000 students successfully trained worldwide and offering over 100 specialized courses aimed at the defence, law enforcement & corporate industries, we aim for 2019 to be another successful year. We could not have achieved this success without the unwavering support of trusted industry specialist partners and business associates.

We have continued to move forward in developing various cutting edge programs such as border control, counter-insurgency or anti-poaching programs, by combining and integrating the latest technological advances in drone technology with standard “professionally trained boots on the ground” solutions to allow for great results in the field.

A major milestone this year has been the achievement which allows us to certify, through an international accreditor, the maintenance and operational driver training programs for the armoured vehicle industry. This has allowed SILVERBACK-AFRICA to be the first training provider in the world to offer these specialized APC driver / maintenance internationally accredited packages to the industry.

We trust that in 2019 you continue to count on our team of discrete professionals for all your tactical & technical training requirements and we thank you in advance for the opportunity to be able to offer you this information package for your kind consideration.

Kind regards,

AMP
Operations
SILVERBACK-AFRICA Partner
Defence & security experts DCS & AMP have been collaborating on global projects over the past decade. With a combined operational background from the military, law enforcement and intelligence communities they offer over 50 years experience. This has been put to good use by providing technical, tactical and strategic solutions to Royal Households, Governments, NGOs, Fortune 10 companies and international humanitarian aid bodies such as UNHCR or the African Union.
Our staff has extensive operational experience, hailing from specialized military units, law enforcement agencies and government organizations. With extensive proven knowledge in the areas of corporate security, the fight against terrorism, anti-kidnapping operations, search and rescue and specialized training of police and military units. Objective, efficient and discreet, we work as a team offering the quality of service necessary to meet the demands of our customers. We comply with the strictest standards of confidentiality, professionalism, integrity and discretion.

Our training programs rank highly and are internationally recognized as as one of the most complete and effective when imparting operational knowledge to students.

At SILVERBACK-AFRICA we strictly abide by codes of conduct dictated by international governing bodies such as the United Nations and international rules and regulations in place defining tactical and technical procurement of services and equipment. We are a United Kingdom regulated company and are compliant with its laws and regulations.

PAST PERFORMANCE PROGRAMS

- Counter-Terror Units
- Close Protection Units
- Private Security Groups
- Law Enforcement Units
- United Nations Personnel
- Security Teams
- Local Authorities
- Humanitarian NGOs
- First Responders
- Military Units
- Law Enforcement Units
- Search & Rescue Units
- Anti-Poaching Ranger Units
OUR PROGRAMS

TRAIN TODAY – SURVIVE TOMORROW

Our extensive operational experience and expertise in specialized training, together with our strategic partners, allows us to offer the quality and the high level of training that has benefited specialized teams of military and police units throughout the world.

We can design specific training programs for your security group, be it public or private, military or police. These highly didactic programs are aimed at guaranteeing results in the effective use of human resources in the most dangerous situations.

Should it be necessary, we have signed agreements in place, with a pioneering industry leading accreditation entity to offer internationally recognized certification in our courses.

Training Modules

- Firearms
- Tactical & Armoured Vehicles
- Vehicle Mechanical & Technical Maintenance
- Canine Units & Handlers
- Close Protection & Corporate Security
- Law Enforcement Modules
- Public Order Modules
- Counter Terror & Counter Insurgency Modules
- Defence Modules
- NGO & Press Orientated Modules
In the field of military and law enforcement training, experienced instructors are obtained mainly through networks of contacts and personal experiences. The shared experiences of these veterans provide valuable lessons, assuring that the lessons learned with blood, sweat and tears, which, in many occasions have been achieved by incurring great personal sacrifices, will not be repeated by others. This is why we collaborate with recognized veteran programs such as United Kingdom Government backed Armed Forces Covenant or the veteran support group, Walking with the Wounded, supporting those who have served and given so much to protect our way of life.

Once a need for training has been identified, a formative, comprehensive and detailed program for the client will be formulated and presented. If accepted, the training provided will be realistic and effective.

**Our Ethos...**

- Professionalism
- Absolute Discretion
- Longstanding Industry Experience
- Bespoke Manufacturer Programs
- Motivated Instructors
- Modern, Updated Training Programs
- Integrity
- Value for Money
- Individual Bespoke Training Modules
- International Recognised Certification
- Global / Multi Lingual Training Centers & Capabilities
All the knowledge that is taught in all our programs is based on proven methods. We provide modules designed to cover all possible contingencies and eventualities. Each course may include a package of support services should this prove necessary. These services will be designed and coordinated to meet your most immediate specific needs.

We firmly believe that a logical approach, based on common sense, combined with a solid understanding of the basic principles of each individual, is necessary before considering the delivery of more advanced training modules. The training courses are designed to adapt to the particular needs of each client. The courses can be taught at our collaborating centers in Europe, Africa or the Middle East, depending on your preference.

Silverback develops training modules tailored to meet the specific needs of each client and are delivered in the most timely manner, in budgets as and when required.
**FIRE ARMS TRAINING**

The handling of firearms is a necessary requirement for agents entrusted with enforcing the law. Members of the armed forces, public order units and members of private security should be able to master the various weapons systems with which they are endowed, in order to guarantee their personal security and that of the general public they are sworn to protect and defend.

We have designed these modules, reinforcing the most basic knowledge and developing on these solid bases, highly complex modules for specialized military and police intervention units.

These modules have been thoroughly studied, compiled and updated by our team of instructors, based on their operational experiences and their experiences in the field of weapons management, which allows students to be equipped with the knowledge and benefits provided by the training for "real world" experiences.

We can offer unique international accreditation in fire arm proficiency programs through our strategic partners SETA International.

**MODULES**

- Tactical Pistol (I-II & III)
- Tactical Carbine (I-II & III)
- Tactical Shotgun (I-II & III)
- Police Marksman
- Military Sniper
- Close Quarter Battle - CQB
- Non-Lethal Dissuasion
- Bespoke Modules
LEADING THE WAY IN INNOVATIVE TRAINING SOLUTIONS

Our training provides an immediate solution to tactical & technical law enforcement requirements

Our bespoke training programs are designed by pooling the unique qualities, knowledge and operational experience of our senior management team and specialised instructor staff. We have access to elite military and law enforcements units, where selected subject mater expert instructors have the ability to design, develop, produce and teach the required bespoke training package. These can be delivered anywhere in the world, at the client’s request...

COURSES COVERED AT OUR TRAINING FACILITIES

- Tactical Firearms Courses
- Counter-Terrorism
- Close Protection
- Surveillance
- Counter-Insurgency Operations
- Special Weapons and Tactics Training
- Public Order Training
- Sky Marshal Training
- Electronic Countermeasures
- Advanced Evasive and Defensive Driving Techniques.
- Armored Vehicle Maintenance & Mechanics
- Use of Force - Self-Defence / Unarmed Combat
- Tactical Communications
- Bespoke Police Training Programs
- United Nations Formed Police Unit Training
- Active Shooter Awareness Training
- Active Shooter First Responder
- Canine Training
- Drone Awareness & Flight Training

Internationally recognized accreditation

We have agreements in place with international accreditation industry leaders to be able to offer accreditation on many law enforcement programs.
ARMOURED VEHICLE MODULES

One of the main aspects that is often overlooked when purchasing an armoured vehicle – be it a commercial model or an Armoured Personnel Carrier (APC) – is the lack of operational knowledge, maintenance or driving skills of the end users, which in most cases leads to premature equipment failure, operational ineffectiveness or even preventable injuries or loss of life.

We have been researching and designing specialized driver and maintenance training programs for armoured platforms, in support of some of the biggest manufacturers in the vehicle armouring industry, allowing them to offer these programs as warranty activation clauses to their clients, thus improving customer service, vehicle operational life span and most importantly helping save lives through practical, operational driver training.

MODULES

- Commercial Armoured Vehicles
- Military APCs
- Urban Tactical Responder
- Armoured Tactical Vehicle Operator - ATVO
- Vehicle Maintenance
- Public Order Vehicles
- Tactical Vehicle Operations - TAVOPS
- Diplomatic Chauffeur
- Security Driver
- Advanced Police Pursuit Driver
- ATVO (I - II & III)
- URAVO (I - II & III)
- Nocturnal Driving (NVG)
Based on our operational experience and field reports, compiled by providing training modules, we have identified improvements in vehicle design which have been recognized by manufacturers and incorporated into successive units to offer an improved product to their customers.

Not only do you need specific training on tactical vehicles, but also on commercial models such as those used by covert police units and private security teams. These programs focus on the various factors that may include road conditions, safety awareness or defensive driving.

Deep knowledge of the components, systems and maintenance programs that will allow the customer to extend the operational life of their armored vehicles is also addressed in other mechanical and electronic training modules.

We can offer unique international accreditation armoured vehicle driving & fleet maintenance proficiency programs through our strategic partners SETA International.

**MODULES**

- Corporate Chauffeur
- Vehicle & Fleet Maintenance Training
- Off Road Module
- Desert Driving Module
- Snow & Ice Driving Module
- Police Motorcyclist
- First Responder Motorcycle Pursuit
- VIP Motorcade Outrider
- Forward Recce Rider
- Ballistic Steel Welding
- Transparent Armour Replacement
- Bespoke Modules
LAW ENFORCEMENT CANINE UNITS

Through our strategic partners, Barcelona based canine specialists, International Detector Dogs Team (IDDT), Silverback can offer the most advanced services available in canine detection units.

These dogs are trained and manipulated by experts to carry out a multitude of functions, including, but not limited to, the detection of weapons, detection of explosives or drugs and attack dogs. We can attend requests for specialized services, and have done so in the past by training canine units to detect gold bullion. We can also provide breeding programs and continuation training.

MODULES

- Drug Detection
- Monetary Detection
- Contraband Detection
- Search and Rescue (SAR)
- Fruit Fly, Fall Army Worm and other Pests
- Medical Alert
- Company & Help Dogs
- Full Turn Key Solution Canine Training Programs
- Bespoke Canine Units
TACTICAL CANINE UNITS

IDDT are a company with over 20 years of operational experience in the canine operations industry. They are specialised in the planning and execution of the most effective and specific security services and solutions for our clients in the sectors of public order, defense and private security.

. Attack & Defense
. Tactical
. Explosive & IED Detection
. Firearms Detection
. Public Order Specific
. Private Security
. Private Property Protection
. Search & Tracking

SEARCH & RESCUE CANINE UNITS

Our dogs go through an extensive process of testing and ratifying of their abilities. Not only must they be able to perform the specific tasks of an explosive detector dog, but they must also be able to operate in many different types of environments and have the necessary social skills to work with the public.

As we have to ensure that our dogs work in a safe, up-to-date and effective manner, as a rule we have adopted, and we maintain the highest standards of specialists in markets such as the United Kingdom, France and the United States. We have adapted these standards to create our own methods and training techniques. Our dogs are trained with samples of real explosives, not pseudo-compounds and must be able to detect nine basic trace odors, including black powder, C4 or TNT before they qualify to be used in defence or law enforcement.
PRIVATE SECURITY
EXECUTIVE CLOSE PROTECTION

The training modules we offer have been written and updated regularly by members of highly experienced protection teams, based on their experiences during their daily routine.

Our faculty have decades of experience in global corporate protection operations, from the luxurious sophistication of executive business security in London or Tokyo to militarised operations in hostile areas such as those faced in Mali or Syria ... students will receive theoretical and practical instruction in a variety of disciplines that are an essential requirement so that the protection specialist can perform his function competently and professionally, to the best of his ability, thus ensuring the safety of his client and carrying out his mission successfully.

**Modules will Include**

- Threat & Risk Assessment
- Operational Planning & Counter-Surveillance
- Interpersonal & Protocol Skills
- Team Work
- Vehicle & Foot Drills
- Route Selection & Movements Planning
- Methods of Searching
- Residential Security
- Incident Management
- Firearms Bolt on Modules

Here at Silverback we have always held in the highest esteem an ethical work code of "Honor, Loyalty and Brotherhood" among our operators, qualities that any individual who wants to work in this profession must at all times take into account in the performance of their duties.
HOSTILE ENVIRONMENT OPERATIONS

The courses that are broken down in this module will make it easier for students who want to pursue a career in personal protection, be it at the level of corporate work or in hostile territories or combat zones, receive the necessary knowledge, skills and accreditations required to find employment.

Module Includes

- Counter Ambush Drills
- Immediate Action Drills
- Searching
- Unarmed Combat
- IED Awareness
- Surveillance & Counter-Surveillance
- Firearms Package
- Tactical First Aid

Our courses are taught by highly experienced instructors, having provided protection services to top executives in Fortune 10 corporations and in the most remote, hostile regions of the planet.

Based on their experiences, they will provide the relevant information and all the necessary skills to successfully 'practice' the profession, bearing in mind that the student will never know if he is able to join his distinguished predecessors until that decisive moment arrives, in which you have to put your physical safety in danger to safeguard another.
Being prepared is the key to survival at times when a life is exposed to danger. Silverback specializes in the design and development of effective, realistic tactical training modules to ensure the welfare of law enforcement officers in their daily operations.

Our goal is to create unique reality based experiences, which allow students to accelerate their learning curve, helping them to master their decision-making skills and improve their life-saving skills, with basic information and techniques which can be easily remembered and accessed at critical moments.

As part of our commitment to the client in providing a unique training experience to the law enforcement community, our modules are comprised of both classroom instruction and practical field exercises that allow our students to take full advantage of the techniques learned and the operational experience from our teaching staff.

**MODULES**

- Firearms Training
- Officer Personal Safety & Security
- Protocol & Interpersonal Skills
- Special Weapons & Tactics Modules
- Police Negotiation
- On the Ground Tactical Commander
- First Tactical Responder Vehicle Operations
- Bespoke Law Enforcement Programs
In this era of staff reductions, mass layoffs and global labor disputes, civil unrest has become more frequent. Spontaneous outbursts of dissatisfaction manifest themselves in a variety of forms, including illegal assemblies, strikes, pickets, civil disobedience, riots, arson, theft and looting.

If confronted correctly, such disturbances can be quickly dissolved. On the contrary, if the police unit lacks training and the correct notions of planning, they could respond with excessive force and initiate a violent situation.

The objective is to teach the less experienced agents how to confront and disperse the angry or rebellious crowds correctly, as part of a team, using the minimum necessary force, thus avoiding and reducing the possibilities of damage and violence. These modules will also serve to reinforce the tactics and techniques of the veteran agent with new equipment, practices and different methods of approach and control.

**PUBLIC ORDER**

**MODULES**

- Understanding Crowds, Resources and Tactical Support
- Shielded Defensive & Offensive Operations
- Ground Tactical Operations and Supported Vehicle Operations
- Mediation & Negotiation
- Crowd Dispersal – Use on Non-Lethal Systems
- Use of Police Marksmen
- Urban Warfare Knowledge
- Police Cordons
- Drone Surveillance Implementation
COUNTER-TERROR / COUNTER-INSURGENCY

Counter-terror & counter-insurgency operations are a highly specialized skill that must only be carried out by a professional and well-motivated team, made up of elite individuals. All our training is based on the necessary requirements to counteract the growing threat that looms over the planet.

Due to the varied nature of the training, it is divided into several correlative modules. The students selected for this type of training must come from military or police units with a solid knowledge of the terrorist’s modus operandi.

All staff delivering these modules are either currently serving or veterans of specialized units.

MODULES

- Multiple Assault Operations
- Urban Marksman – Counter Sniper Operations
- Tactical Assaulting – Dynamic Entries
- Assault Vehicles
- Assaulting Buildings & Structures
- Breaching
- Fighting in Confined Spaces
- Linear & Tubular Assaulting
- Operational Planning, Command & Control
DEFEENCE MODULES

We offer training solutions tailored to meet the training needs of defense departments. We have a wide range of tools to design and deliver highly effective programs in defense, counterinsurgency and border control matters.

Training programs like ours are a requirement for any organization or individual that wishes to stay ahead in the fight against the growing global threat.

MODULES

- Operational Risk Assessment
- Operational Planning
- Tactical & Technical Readiness
- Selection and Recruitment Programs
- Command & Control
- Bespoke Defense Programs
Silverback, in collaboration with the Royal College of Surgeons (Edinburgh) can offer a comprehensive tactical medicine curriculum designed for EMS and medical professionals, which exceptionally integrates both training and tactics; practical training, use of realistic practical scenarios, instruction with firearms for self-defense and personalized attention throughout the course.

Taught by an experienced team of instructors with extensive experience in the field and from diverse backgrounds, our courses encompass the essential knowledge of tactical medicine, including patient assessment, tactical evacuation, and self-defense skills. The training in tactical medicine will provide the designated medical professionals to accompany units in a hostile environment, the knowledge necessary to carry out their mission successfully and in a safe manner.

**MODULES**

- First Person on the Scene Intermediate (FPOS-I)
- Medicine in Remote Areas - MIRA
- Public Order Medic - POM
- Vehicle Extraction Methods - VEM
- Tactical Medical Methods - VEM
- Tactical Medical Provider – TMP
NGO & PRESS

We are able to design tailor-made courses to meet the needs of members of the press and staff of Non-Governmental Organizations (NGOs) deployed on information gathering & reporting or humanitarian operations, that take place in hostile areas, where the threat of an attack against prominent personnel is more than likely.

Designed primarily for those who plan to work or deploy in a country in conflict or where it has recently ceased, in areas where weapons, improvised explosive devices and mines are prevalent. The course is taught by former members of Special Forces units, EOD and paramedic personnel with extensive operational experience.

The courses can be designed to update and improve the previous training that students have already acquired by other organizations and increase the individuals capability to deal successfully with high-risk incidents and situations.

MODULES

- Hostile Environment Awareness Training - HEAT
- Contractors On Deployed Operations - CONDO
- Improvised Explosive Device Awareness - IED
- Unexploded Ordinance Awareness - UXO
- Mine Awareness
- Kidnap Awareness
- Survival & Personal Security
- Escape & Evading Capture
Here at Silverback, we specialize in the research and development of new technologies designing new training modules that incorporate them, both for government personnel and corporate clients.

With the marked technological advances in the security and defence industries being developed on a daily basis, training programs like ours are a requirement for any organization or individual that wishes to keep abreast of the growing global threat.

We are specialists in undertaking any project that requires a training program, developing it and implementing it ... anywhere in the world.

**TRAIN TODAY - SURVIVE TOMORROW**
Many aspects of the defence & law enforcement markets have seen a marked increase in the use of ever developing technical means to be employed in their daily duties, such as the use of drone technology, frequency jamming equipment or remote control weapon systems. These new technological solutions require specialized knowledge and technical skills to operate and maintain correctly.

Silverback has allied with various industry manufacturers & suppliers in these technologically specialized areas, allowing our instructors to attend specialized training seminars at the manufacturing facilities and in conjunction with designers, developers & engineers create an internationally recognized accredited training package, which can be delivered to any customer. These training packages are being used as a guarantee by manufacturers that basic product knowledge has been passed on to the end users and the successful delivery of these training packages allows for the activation of the product warranty, thus reducing warranty claims (85% reduction as of 2018) based on product misuse or lack of maintenance.
Prior to giving approval to any product in our equipment portfolio, we require the manufacturer to supply various samples of it, which are extensively tested by our SILVERBACK personnel in the field. In the case of technical systems that require prior training before use, our specialized instructors are dispatched to the manufacturers plant to receive through instruction in it's use and maintenance, before returning to us and developing the learnt skills into a deliverable training package suitable for a client’s needs.
SPECIALISED EQUIPMENT PROCUREMENT

We hold an extensive catalogue of all kinds of tactical and technical law enforcement, defence and security equipment.

Our strategic partners are direct manufacturers and afford the necessary licensing and logistical capabilities to be able to export arms & ordinance, to organisations who strictly comply with international governing laws & regulations.

Experienced members of our team are available to test, independently assess and advise clients prior to purchasing any equipment solutions.
SUPPORTING THE WORTHY & FIGHTING THE GOOD FIGHT...

Within our organization a new department is born... Bad Ape

The aim of Bad Ape is to support worthy entities “in the field” by providing logistical support, training and operational procedures to anti-poaching, forestry rangers and environmental control officers by delivering non-profit seminars and bespoke courses, by SILVERBACK instructors, to address their operational requirements. These courses include medical, drone management, personal safety amongst others. We aim to improve, support, mentor, sponsor operational personnel and above all raise awareness of those who sacrifice so much to preserve our unique planet...
Since 2010, our team of dedicated professionals has trained over 4,000 students in a wide variety of fields such as law enforcement, private security and defense internationally.

With an extensive operational experience, our instructors come from specialized military, police, intelligence, medical and private security groups.

As such, our instructors have accredited experience in matters of corporate security, the fight against terrorism, kidnapping, specialized training and training in security and defense matters. Professional and discreet, our staff work together as a team, offering the quality of training necessary to meet the needs of the client.

 TRAINING CAPABILITIES

- Capable of Deploying Globally
- Multi-lingual, multi-skilled, multi-disciplined Team
- Proof of Past Performance
- Internal Company Staff Continuation Training
- Over 100 Training Programs Delivered Successfully

NB-It should be noted that these courses are only available to members of law enforcement, military, government entities and security forces upon written approval of their respective government departments.
OUR TRAINING ASSETS

To secure the best training locations for our instructors to impart our training programs we have selected the best facilities to host them.

No matter what type of training may be required we have a selection of facilities across 3 continents which allows us to offer the client the most suitable to his needs.

See our locations below:

1 Tactical Abseiling & Rescue Training - UK
2 Driver & Fire Fighting Training - Spain
3 Tactical & Technical Law Enforcement/Military - Germany
4 United Nations Pre-Deployment Training - Africa

OUR TRAINING FACILITIES

Signed strategic agreements with both corporate and government agencies allow us the use of specialized training and teaching facilities in different continents, which are normally reserved for use by law enforcement agencies or the armed forces.

INTERNATIONAL PRESENCE

Our strong working relationships with strategic partners allows us access to offices and training facilities which enables us to have an international training & procurement presence.
